

Wireless Nurse Call Solution EN1221S Waterproof Pendant

The EN1221S Waterproof Pendant is small, light weight and comfortable to wear, and provides advanced functionality and reliability to enhance the user experience.

The pendant can be suspended on an anti ligature lanyard around the user's neck or worn like a watch.

Confirmation of alarm activation is provided by the pendant and the alarm is cleared using a magnetic card or button press pattern. The pendant will check into the system every 60 minutes to confirm its status.

It is powered by a user replaceable coin cell battery and the condition of the battery is monitored and reported. The pendant is waterproof and suitable for use while showering or bathing or any situation where it is likely to get wet.
